CSS
Python

WORK HISTORY

UX Design Intern
Yugabyte
June 2020 - August 2020

- Designed wireframes and high-fidelity screens of the website including user success stories and product pages.
- Redesigned and updated experience of the website.
- Performed a competitive design and usability study of Yugabyte website against comparable in-market offerings.

Undergraduate Researcher
UW Social Identity Lab
Sept 2018 - June 2019

- Conducted studies with over 100 participants to assist graduate students with their research.
- Completed literature reviews on topics of social identity and race.
- Collaborated with graduate students on research and analyzed statistics on various research studies.

UX Design Intern
Kroger Digital
June 2018 - Sept 2018

- Completed design sprints on shopping list and coupon features Kroger Co. mobile apps.
- Conceptualized and created wireframes and prototypes during design sprints.
- Conducted user research to test prototypes and identify opportunities based on users for iteration.

CONSULTING PROJECTS

Pfizer, Inc.
Jan 2020 - April 2020

- Completed competitive analysis, interviews, and usability tests of COMPASS, their internal workplace management system.
- Recommended solutions to improve usability and interface of COMPASS.

Mary A. Rackham Institute
Aug 2020 - Dec 2020

- Analyzed behavioral and academic testing used for student athletes at the University of Michigan to broaden for larger student population.
- Identified pain points and recommended solutions to streamline and generalize the testing process to low-income university students.
