SUMMARY

Product Designer with experience leading UX design across enterprise and consumer digital products. Skilled in user research, interaction design, information architecture, wireframing, prototyping, usability testing, and translating user needs into product solutions. Experienced collaborating with product management and development teams from concept through validation.

EXPERIENCE

May 2021 – Present

Senior Analyst – Product Design

Nasdaq (Rockville/D.C.)

- Lead Product Designer for the redesign and iteration of a legal questionnaire tool.
- Research, ideate, design, test, validate, and measure solutions that address client needs and business goals while introducing new technology and features.
- Develop navigation structures and information architecture; create prototypes, storyboards, and mockups to communicate designs to product management and development.
- Collaborated on the design and usage of the company design system to iterate on the alignment of look and feel Governance products to other Nasdaq products.

June 2020 – August 2020

UX Design Intern

Yugabyte (Sunnyvale, CA)

- Designed wireframes and high-fidelity screens for the website, including user success stories and product pages.
- Redesigned and updated the website experience.
- Conducted a competitive design and usability study of the Yugabyte website against comparable in-market offerings.

June 2018 – September 2018

UX Design Intern

Kroger Digital (Cincinnati, OH)

- Collaborated on design sprints for shopping list and coupon features within Kroger Co. mobile apps.
- Designed and created wireframes and prototypes throughout design sprints.
- Led user research and interviews to test prototypes and identify opportunities for implementation.
