Figma
Sketch

**Programming Skills**
HTML
CSS
Python

## WORK HISTORY

**UX Design Intern**
Yugabyte
June 2020 - August 2020

- Designed wireframes and high-fidelity screens of the website including user success stories and product pages.
- Redesigned and updated experience of the website.
- Performed a competitive design and usability study of Yugabyte website against comparable in-market offerings.

**Undergraduate Researcher**
UW Social Identity Lab
*Sept 2018 - June 2019*

- Conducted studies with over 100 participants to assist graduate students with their research.
- Completed literature reviews on topics of social identity and race.
- Collaborated with graduate students on research and analyzed statistics on various research studies.

**UX Design Intern**
Kroger Digital
*June 2018 - Sept 2018*

- Collaborated on design sprints on shopping list and coupon features Kroger Co. mobile apps.
- Designed and created wireframes and prototypes during design sprints.
- Led user research and interviews to test prototypes and identify opportunities based on users for implementation.

## CONSULTING PROJECTS

Pfizer, Inc.
*Jan 2020 - April 2020*

- Recommended solutions to improve usability and interface of workplace management system COMPASS.
- Conducted competitive analyses, heuristic evaluation, remote usability tests, and survey analysis of COMPASS website.

Mary A. Rackham Institute
*Aug 2020 - Dec 2020*

- Conducted stakeholder interviews to analyze behavioral and academic testing used for student athletes at the University of Michigan to identify gaps in information and pain-points.
- Analyzed data through an affinity wall with contextual inquiry and qualitative analysis in order to provide recommendations to redesign the process.
